### EOC as students progress through the books

In general students' EOC scores get lower and lower as they progress through the book.

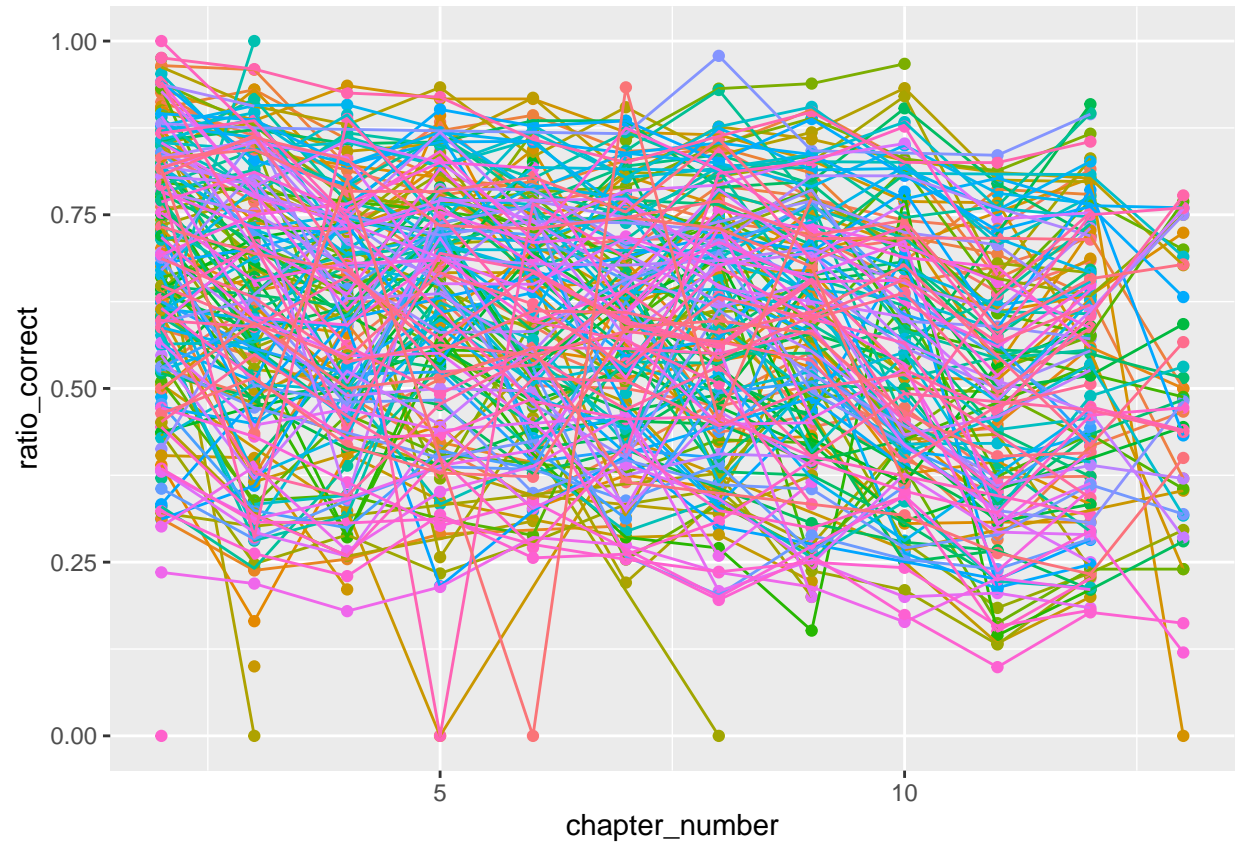

```
levels(big$book) [1] "College / Advanced Statistics and Data Science (ABCD)"  
[2] "College / Statistics and Data Science (ABC)"  
[3] "High School / Advanced Statistics and Data Science I (ABC)"
```

```
big |> ggplot(aes(x = ratio_correct, color = institution_id)) +  
  geom_boxplot() # ratio_correct by institution
```

```
# Convert book column to factor  
big$book <- factor(big$book)
```

```
big |> ggplot(aes(x = chapter_number, y = ratio_correct), group = student_id) +
  geom_point(aes(color = student_id), show.legend = FALSE) +
  geom_line(aes(color = student_id), show.legend = FALSE) # this is too cluttered
```

```
big[as.numeric(big$book) == 1,] |>
  ggplot(aes(x = chapter_number, y = ratio_correct), group = student_id) +
  geom_point(aes(color = student_id), show.legend = FALSE, alpha = 0.5) +
  geom_line(aes(color = student_id), show.legend = FALSE, alpha = 0.5) # slightly less so
```

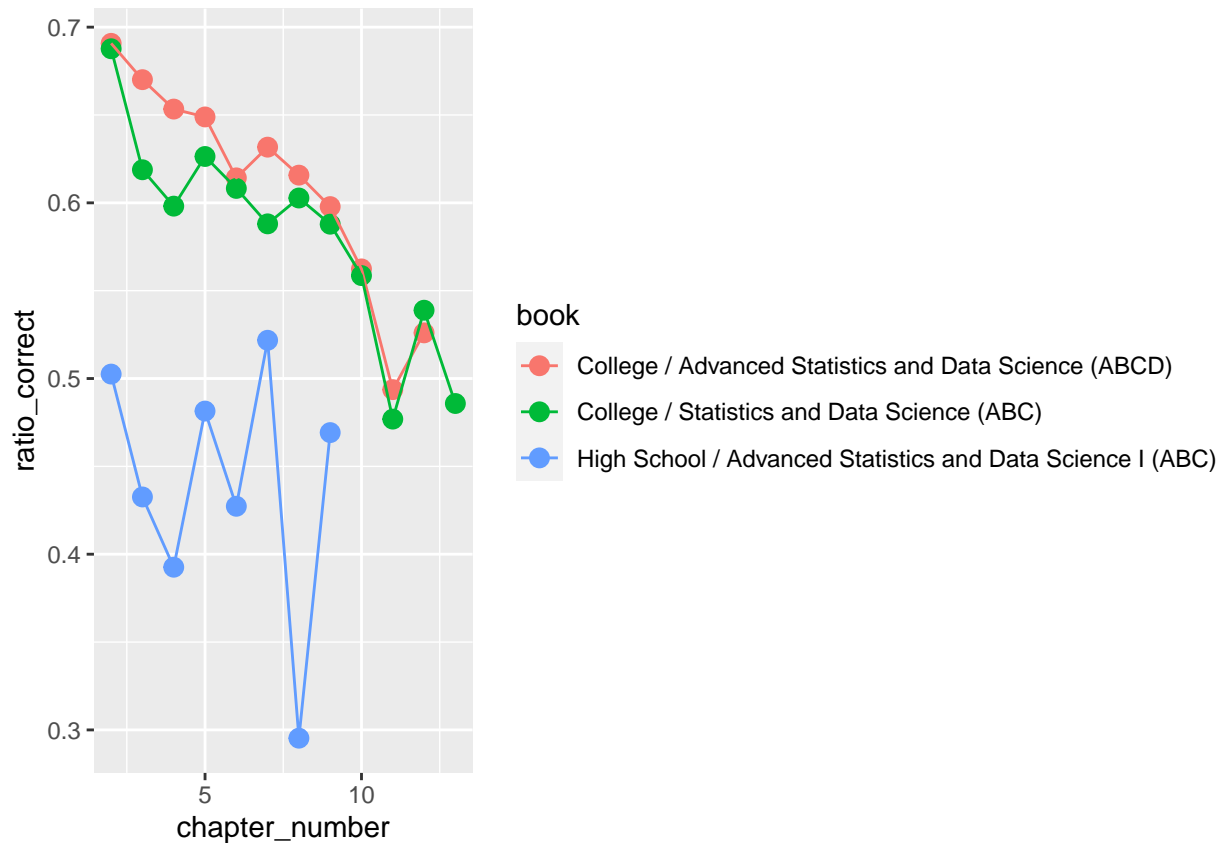

```
big[big$ratio_correct > 0.5,] |>
  ggplot(aes(x = chapter_number, y = ratio_correct), group = student_id) +
  geom_point(aes(color = student_id), show.legend = FALSE, alpha = 0.5) +
  geom_line(aes(color = student_id), show.legend = FALSE, alpha = 0.5)
```

```
big |> group_by(book, chapter_number) |> summarize(ratio_correct = mean(ratio_correct, na.rm = TRUE)) |>
  geom_point(cex = 3) +
  geom_line() # chapter_number vs ratio_correct by book
```

## `summarise()` has grouped output by 'book'. You can override using the  
## `.groups` argument.

# Why are high schoolers scoring so low? Seems like they don't differ too much in time engaged/idle/off page or anything actually maybe they're just stupid

```
# Remove outliers
big[big$n_attempt < 300,] |> group_by(book, student_id) |> summarize(n_attempt = mean(n_attempt, na.rm = TRUE))
ggplot(aes(x = n_attempt, color = book)) +
  geom_boxplot() +
  theme(legend.position = "bottom")
```

```
## `summarise()` has grouped output by 'book'. You can override using the
## `.groups` argument.
```

! Statistics and Data Science (ABCD)  College / Statistics and Data Science (ABC)  High School / Advance

Are students who start out struggling still struggling?

```
